

Andrew Choi

Cambridge, UK | (+44) 7467-245855 | jaehyungchoi0923@gmail.com

EDUCATION

University of Cambridge – Cambridge, UK

Expected June 2027

Engineering Tripos (BA & MEng) | Grade: 1st Class in 1st year, Upper 2:1 in 2nd year

Concentration: Information and Computer Engineering

PROFESSIONAL EXPERIENCE

Arm Ltd – Cambridge, United Kingdom

July 2024 – September 2025

Software Engineering Intern

- Migrated flagship Arm MOOC courses from Mbed OS to modern stacks (MicroPython, CMSIS, IoT with MQTT/AWS), ensuring long-term maintainability and improving learning resources
- Designed and deployed an AI-powered chatbot using Retrieval-Augmented Generation (RAG), AI Agents, and LangChain in Azure AI Studio, improving productivity and response accuracy
- Built automation tools in Python, including a compliance-checking system reducing manual workload by 10+ hours per cycle, and a metadata generation tool using GPT-5 and LangChain
- Developed and optimized LLM models on ARM devices (Android/iOS) through pruning and quantization for efficiency
- Created a Developer Labs website with improved UX, search/filtering, and automated CI/CD pipelines, driving community adoption and contributions
- Co-organized a 32-hour AI hackathon with Cambridge University Engineering Society, launching new developer resources and boosting external engagement

Auto-ID Labs KAIST – Daejeon, South Korea

June 2023 – September 2023

Machine Learning Research Intern

- Built an AI Speaker on Raspberry Pi integrating OpenAI Whisper, GPT-3.5-Turbo, and Humelo TTS API.
- Deployed deep learning models (YOLOv8, FastSAM, Ultra-Fast-Lane-Detection-V2) on edge devices including Xilinx FPGA and NVIDIA Jetson Orin.
- Designed a real-time lane detection system using GoPro Hero11 and NVIDIA Jetson AGX Orin; optimized inference with TensorRT for lane departure warnings.
- Presented AI research and demos at the GS1 Exhibition, including a direct briefing to the CEO of GS1.

LEADERSHIP & PROJECTS

Claude Builder Club – *Founder & Lead Organizer*

August 2025 – Present

- Established and facilitated the official Claude Builder Club, fostering a community of students and researchers exploring frontier AI tools.

Device Programming

January 2024

- Programmed an STM32 Nucleo-144 in Keil Studio to record/playback color sequences and measure temperature via I2C with LM75 sensor, triggering hardware interrupts on threshold events.

Integrated Design Project

October 2023 – December 2023

- Led the software team to implement a line-following and path-finding algorithm on Arduino with IR sensors, integrated ultrasonic/ToF sensors for object detection, and managed project timelines across electronics and mechanical teams.

PORTFOLIO, LANGUAGES, AND SKILLS

Portfolio: LinkedIn: <https://www.linkedin.com/in/jaehyung-andrew-choi/>, GitHub: <https://github.com/jc2409>, Website: <https://jc2409.github.io/Andrew-Choi-Portfolio/>

Languages: Korean (Native), English (Professional Working Proficiency)

Skills: Python, C, C++, Embedded Systems, Embedded C, FPGA, CMSIS, On-Device AI, Git, Docker, Linux, AWS EC2
